

**BUSINESS  
GROWTH  
REQUIRES  
FOCUS.**

**LEAVE IT TO US  
TO DO THE CLEAN UP.**

## MANAGED HOSTING SERVICES

It's easy to lose track of your priorities. It starts with issues like what servers to buy and what firewall to install. Then the OS breaks down, security is breached and network disruptions becomes a daily problem. Things can get messy.

It's simply smart to outsource your core and critical IT requirements with AIMS Managed Hosting Services. Your business gains by reducing costs and complexities, and increasing operational efficiency.

For a start, we'll provide the server, OS and hardware according to your specifications. Then we'll manage it all for you: the hardware, OS, network, security, backup and storage. Everything can be configured to your specifications.

With no upfront investment in hardware or software, you enjoy cost

savings in manpower, training and management of servers.

Our round-the-clock engineering support continuously monitors your entire system to ensure that it runs optimally. Expert help is immediately on hand to solve any unforeseen glitches, such as network disruptions and urgently required additional bandwidth.

With these necessities in our care, your resources are free to do what they do best: focusing on what's really important for your business growth.
